WHY STAY FAT YOU CAN REDUCE

The answer of most fat people is that it is too hard, too troublesome and too dangerous to force the weight down. Marmola Prescription Tablets overcome all these difficulties. They are absolutely harmless, entail no dieting or exercise, and have the added advantage of cheapness. A case is sold at one dollar by all druggists the world over, or send the price direct to the Marmola Co., 4612 Wood-laward Ave., Detroit, Mich. Now that you know this, you have no excuse for being fat, but can reduce steadily and easily without going through long sieges of tiresome exercise and starvation diet or fear of bad effects.—Adv.

Financial Comment

The Los Angeles Chamber of Commerce is about to build a new home which will cost in excess of \$2,000,000. It owns a valuable piece of property, but had no money with which to be gin construction. In order to get quick action, it was necessary that \$500,000 be raised immediately. The chamber arranged to issue bonds to the amount of a half million dollars, and then went to the Bond Club of Los Angeles and asked the bond men to dispose of the issue

By JAMES WILBUR.

The response was spontaneous. The Bond Club, the membership of which comprises fifty-three firms, immediately undertook the sale of the securities, with the understanding, however, that the member firms were to accept no remuneration for the work.

There was no blowing of trumpets to herald the undertaking. The bond men held a dinner at which the needs of the Chamber were set forth and the character of the bonds analyzed. It was shown that while the Chamber of Commerce was in every way de serving of the greatest consider-ation in any financing of which it might be in need, it came to the bond men with a sound and clear-cut business proposition which under any conditions would deserve serious attention.

With such whole-hearted support the band merced.

port, the bonds moved out rapidly, and within a few days the entire lot had been placed with investors of the city.

The result of this sale of bonds is significant. It demonstrates that the efforts of the Chamber of Commerce in behalf of the city are recognized; that the bond men of Los Angeles are willing and able to do their part in support of the institution; and finally that the investors who bought these bonds have an abiding faith in the financial standing of the Los Angeles Chamber of Commerce.

It is such perfect coordination of effort that has been responsible for the amazing growth of Los Angeles, an example of team-work which might well be emulated by many other cities in Southern California.

Santa Ana during this year has been promised, it was agreed today, by the number and value of building permits issued during the first ten days of this month and year.

Building permits issued since the beginning of the New Year called for a construction valuation of more than \$155,000, according to the records of W. S. Decker, building inspector.

This is at the rate of more than \$15,000 a day.

This rate has been established on a conservative basis as no permits, the records declare, have been issued this year to date for other than average valuation; except one, issued to the Southern California Edison company for 22,000 for ejection of a new garage and store-

Assuming that this conservative rate is continued throughout the year, the total valuation of building permits will reach more than \$5,475,000.

Many new projects furthermore are under way and indicate that year's total may far exceed this estimate.

The proposed new First National Bank building will cost probably between \$400,000 and \$500,000. The Y. M. C. A. building, con-

struction of which should begin in March, will cost, according to estimate, more than \$200,000. BUYS a new 5 room, strictly modern bungalow, just simply a beauty. Lot 50x125, best of location. See this and your search for a home will be ended. Cleve Law 408 N. Birch

A man owned a large house, with eight smaller houses around it. (See diagram.) There were two circles of trees, as shown in the diagram. In renting out the small houses, the man wanted to keep the outercircle of trees to himself. How did he divide the land?

Yesterday's answer: If a man sold an automobile for \$200, bought it back for \$190 and sold it again for \$220, he made \$30 as he started with \$200, and had \$230 at the end. Either \$20 or \$40 are common answers to this puzzle, but both are incorrect.

WELCOME, BIG BUILDING

Santa Ana is to have a six-story building. The big structure will be welcomed in Santa Ana not only because it will be in itself an improvement of the ordinary reader. in which every citizen of the city can take pride but because it marks another milestone in the deemblazones across the sky a declaration that Orange faith in the future of Santa Ana.

There was a time in Santa Ana when there was William H. Spurgeon put up a California-built structure here and said, "This is Santa Ana," he had no years of past history in progress in this section to back up his optimism. There came a time when the building of a brick building was quite a venture. The first hotel, the first two-story brick-these took faith because Santa Ana did not have back of it long years of business life and a great area of developed orchard and farming lands.

In building the new six-story structure, the First National shows its faith in the future of Santa Ana, to be sure, but it knows whereof it builds. It knows of the community, and is better able than anyone else to judge of the foundation upon which Sarta Ana's prosperity and future rests. It knows that the foundation is solid, substantial and bound to be

So, we welcome the coming of the big building, not only for what it will be but for what it means.

The average individual is an "Immediatist." First cost, existing desires and immediate results seem more important than permanent betterment. Wherein is Real Courage

"Which is the better, to die a heroic death or to lead a noble life?" asked the old time debaters.

A driver yesterday at Dallas decided that it was better to do the heroic thing than to do the commonplace but noble thing. He did not die, though he risked his life, and was seriously hurt.

He saw that his car was certain to run into a man and a woman carrying a baby. There was but one thing to do to have the life of the baby and the woman and the man. He turned his car directly into the truck on the highway.

The life of the baby and the woman and the man were saved. But incidentally, he caused the death of two of his companions, and badly hurt three others, as well as himself. He had been driving 80 miles an hour.
